Experience

SOFTWARE ENGINEERING INTERN
BlackRock
📅 Jan 2024 – Present   📍 Gurugram, Haryana
- Tech Stack- Java, Spring Boot, Hibernate, Selenium
- Working on projects based on Java.

TEACHING ASSISTANT - MERN
Testbook
📅 May 2023 – Present   📍 Remote
- Tutoring students for MERN stack development and clearing doubts on their web development projects.

WEB DEVELOPER INTERN | View Cerificate |
InGelt
📅 Feb 2023 – March 2023   📍 Remote
- **Set up billing using Google Maps API** and integrated the payments gateway. **Reduced API cost by about 50%**
- **Set up the database** with "Sanity.io", added data, generated queries, and **integrated the front-end** with the dynamic data.

FULL STACK WEB DEVELOPER ↗
Official WebTeam of NIT Jamshedpur
📅 April 2022 – Present   📍 Jamshedpur, India
- **Built ReactJS** pages and stateful components using libraries like Material-UI, Formik, Ant-D, etc.
- Sent form data to API and **created API endpoints**.

Projects

ERAKT | View Project | Source Code |
Tech Stack: ReactJS, Firebase, Google Maps APIs
📅 Oct 2023
- Created a platform for patients to track the availability of blood of their blood group.
- Used Maps API, Places API, and Routes API for loading and marking places on Google Maps.

FINTRACKER | View Project | Demo Video | Source Code |
Tech Stack: ReactJS and Firebase
📅 April 2023
- Made for GFG hackathon. **Led the project** which finally **got Zomato coupons** as a prize.
- App is made for splitting bills among users. The app uses **Firebase Auth** for authentication and **Firestore database** for storing data. Hence, provides better privacy and security.
- Users can add groups for various trips. Can add transactions for a group, settle them, and delete them. Can view overall outstanding balance with the friends. Also added a community section for messages/chats for a group/public.

FILE SYSTEM CRUD API | View Project | Source Code |
Tech Stack: NodeJS (ExpressJS)
📅 Dec 2022
- An API platform containing multiple routes for CRUD operations made using NodeJS and ExpressJS.
- It performs all the CRUD operations using the "fs" and "multer" node packages.
